HOW TO FIND A SCIT ITEM USING THIS CATALOG

If you know the **Daniels (DMC)** part number and description -
Refer to section I SIN categories to find the NSN

If you know the NSN number -
Refer to section II NSN Cross Reference Index to find the **DMC** part number.

If you do not know the **DMC** part number or NSN number -
Call **DMC** for technical assistance.

WHAT IS A SCIT NSN AND SIN CATEGORY?

GSA established the SCIT (Standardization and Control of Industrial Quality Tools) Program to maintain standardization and control of tool inventories.

A SCIT NSN is a national stock number assigned by GSA to a manufacturer's part number. Substitutions of other manufacturers tools are not allowed under these unique stock numbers.

A SIN (Special Item Number) is a category number assigned by GSA to a specific group of tools.

Ordering the SCIT NSN guarantees exact replacement!

TWO EASY METHODS OF ORDERING:

1. To order by NSN submit FEDSTRIP or MILSTRIP requisitions direct to GSA.
2. To order direct from **DMC** contact us by Phone **800-327-2432**, Fax **407-855-6884**, or E-Mail us at **DMCTOOLS@AOL.COM** for pricing information.
I.M.P.A.C./VISA credit card or purchase order (NET 30 TERMS) are acceptable methods of payment.

ADDITIONAL CATALOG/PRODUCT BROCHURES:

To receive additional information about any of the products contained within this catalog or information on other products manufactured by **DMC** please contact us at **800-327-2432** or fax us the product request form located at the end of this catalog.

DMC is a small business firm / DMC CAGE Code: 11851
Government I.M.P.A.C. credit card accepted;
for details call 800-327-2432

GSA/SCIT SIN Categories

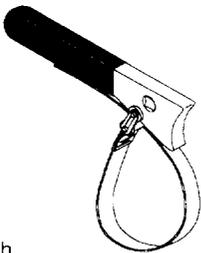

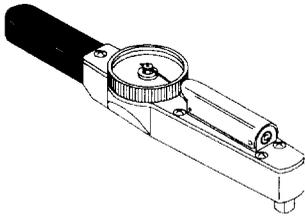

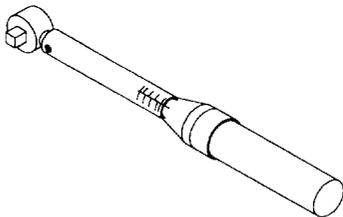

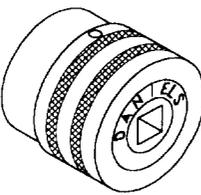

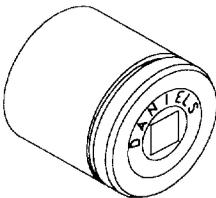

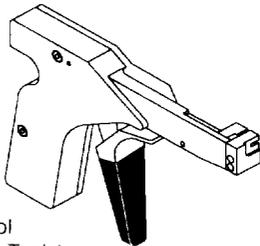

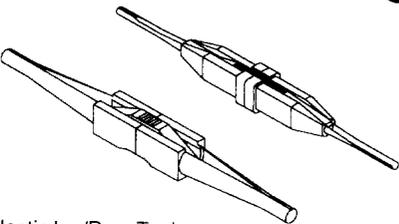

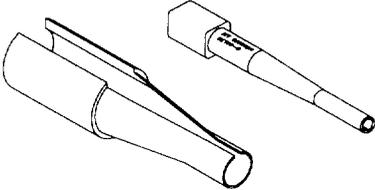

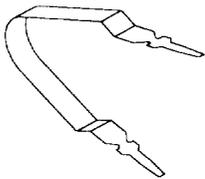

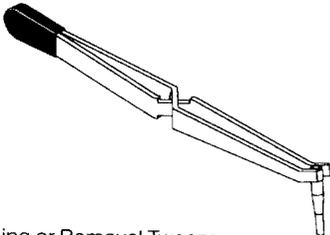

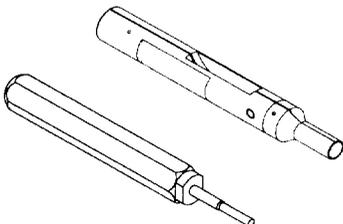

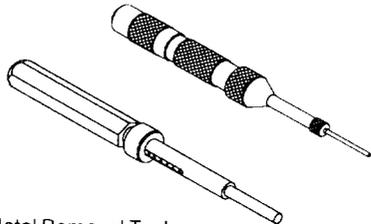

Products which are listed in this section are following:

1. **SIN # 612-052**
WRENCHES, STRAP:
Tools which have flexible, replaceable straps and a handle assembly.
These tools are specially configured to tighten/loosen connector components.
2. **SIN # 612-055**
WRENCHES, TORQUE
Tools which are used to apply a measured torque to connectors and other threaded components.
3. **SIN # 612-099**
INSERTION TOOLS, (Electrical connectors & Adapters)
Tools which are configured to mate with the alignment keys of circular connectors. These tools are used to hold the connector stationary while the accessory parts are being installed.
4. **SIN # 612-097**
INSTALLING TOOLS (Plastic Strap)
Tools which are used to apply tension and cut cable ties (plastic straps) during the assembly of a wire harness.
5. **SIN # 612-098**
REMOVAL TOOLS (Electrical Contact)
Tools which are used to insert or remove the replaceable pins or sockets (contacts) from electrical connectors.
6. **SIN # 612-099**
INSERTION TOOLS (Electrical Contact)
Tools which are used specifically to insert pins or sockets (contacts) into electrical connectors.
7. **SIN # 612-109**
CRIMPING TOOLS (Contact Positioner, Turret Head, Hand Terminal)
Tools which are used to terminate a wire end fitting (contact, terminal, etc.) by crimping.
8. **SIN # 612-119**
Strippers, Wire and Cable (Including Replacement Blades)
Tools which are used to remove the insulation from the end of the wire which is to be terminated.
9. **SIN # 612-120**
Cutters, Cable
Tools which are used to cut wire into segments.

Safe-T-Cable™

DMC DANIELS
MANUFACTURING
CORPORATION

THREAD...

Through the fasteners.

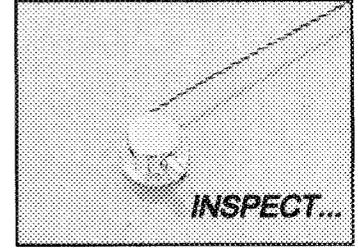

INSERT...

Through the ferrule and into the tool.

CRIMP...

The tool precisely tensions, crimps and cuts.

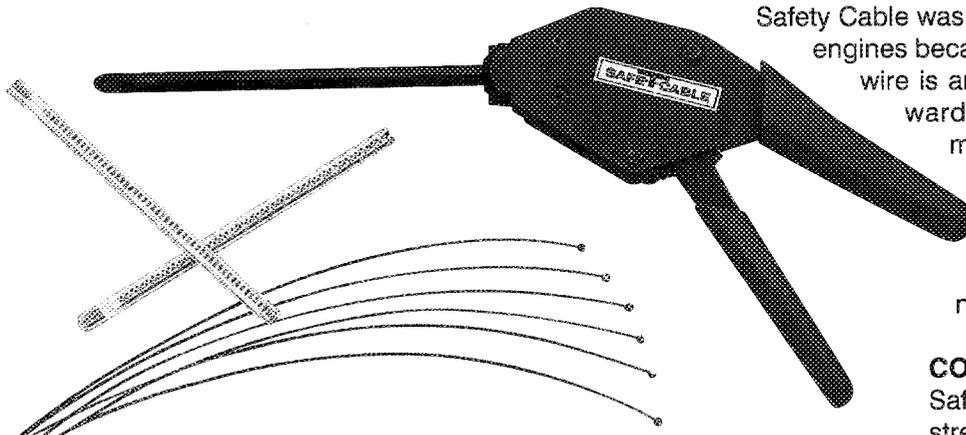

INSPECT...

A secure installation in a fraction of the time.

BEAT THE HIGH COST OF LOCKWIRE WITH Safe-T-Cable™

Safety Cable was invented by a major producer of aircraft engines because the installation of hand twisted lockwire is an expensive, time consuming, and awkward process. This simplified application method relies on the consistency of a precisely calibrated application tool rather than operator skills.

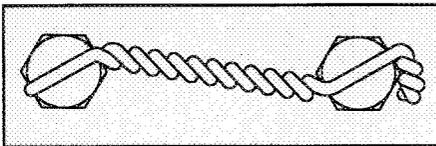

Safety Cable will cut time and cost from your manufacturing or maintenance process.

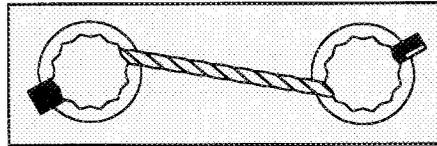

**SCT327
SHOWN**

CONSTRUCTION:

Safety cable is constructed of high tensile strength, stranded cable. It is more flexible than its lockwire counterpart, although the working diameters are equivalent. This provides a stronger assembly which has greater strength and lighter weight. The cable end is electrically fused to form an easy threading ball. The cable is pre-cut to various lengths, and is supplied with a square-formed end cap attached to one end.

LOCKWIRE
