Global centers of Excellence

Today, licensed Chicago Pneumatic distributors can be found in almost every country of the world, and supply end-users with an ever-increasing range of industrial construction tools and compressors.

Since 1901 the Chicago Pneumatic name has represented high-performance tools and equipment designed for **an extensive range of industrial applications.**

Close to customers

Our tools, compressors and equipment have helped build many of America's landmarks, and today you'll find us anywhere you operate, with **local customer centers and distributors around the world.**

Decades of innovation

Meeting specific needs in a wide range of industries has led to ground-breaking Chicago Pneumatic innovations. Just to name a few:

- 1901** First single-valve pneumatic hammer
- 1904** First electric tools and railway speed recorder
- 1910** Quarry drills
- 1911** Engines for cars and trucks
- 1912** Simplate valve

- 1912** Two-cycle semi-diesel engine for compressors
- 1925** Rotary oil-well drilling equipment
- 1925** Engine manufacturing
- 1939** First impact wrench

- 1943** "Rosie the Riveter" appears in this "We Can Do It" image and on Norman Rockwell's famous *Saturday Evening Post* cover, holding a CP riveting hammer on her lap

- 1957** Portable broach puller, construction impact wrenches
- 1960s** Tools customized for Boeing 737 and 747, Lockheed L1011 and C5A, Douglas DC-10, new Concorde

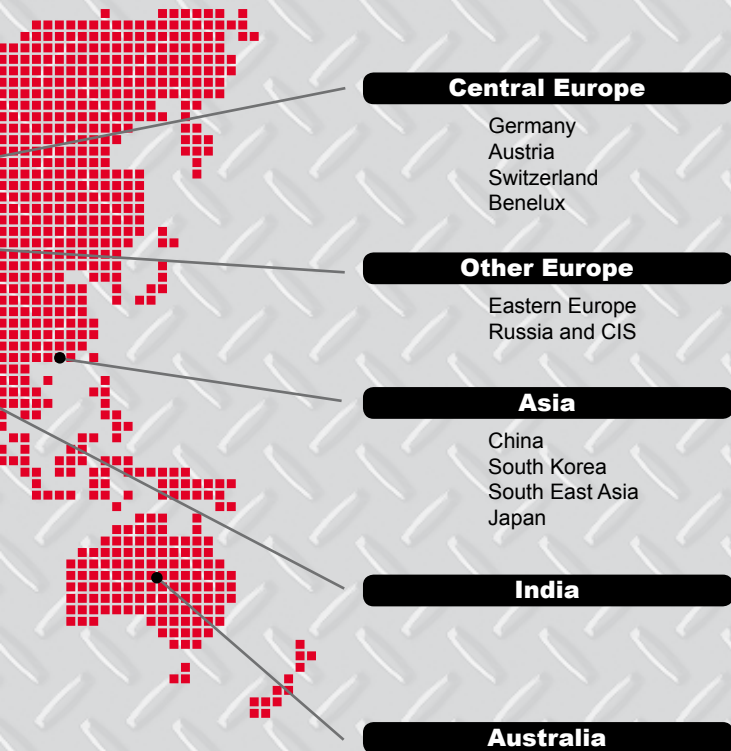

RANGE IN BRIEF

Building on success

Whether working in a small foundry or maintaining a large petrochemical plant, it is your needs that Chicago Pneumatic strives to meet. Your experience with our tools, compressors and equipment is what drives our research and development teams to deliver durable and reliable products. It is our mission to keep you productive at all times.

Customer Centers

Industrial and maintenance tools

Hundreds of tools designed to meet specific application needs. Impact wrenches, screwdrivers, grinders, sanders, drills and percussive tools.

Industrial compressors

Piston compressors, rotary screw compressors and compressed air solutions are available for a wide range of industrial applications and the automotive industry.

Portable compressors and generators

Light, transportable power generators and portable screw compressors - reliable and clean for air or for power, therefore for all types of equipment and tools.

Construction tools

Handheld hydraulic, pneumatic and petrol-driven tools, rig-mounted hydraulic breakers, light compaction and concrete equipment.

Light compaction equipment

Forward and reversible soil and asphalt plates, rammers, duplex rollers.

1971 Crimnut tool a breakthrough in critical joints for vehicle assembly

1970s Patented two-jaw clutch for impact wrenches

1981 CP341 Pneudraulic riveter

1990 CP789H reversible drill, CP828H ratchet, CP854 angle grinders

2000 Governed, oil-free grinders

2007 Magnesium & composite impact wrenches

1990s Hundreds of application specific products for construction, demolition, vehicle maintenance, heavy equipment maintenance, manufacturing and other industries

2010 New Chicago Pneumatic Brand colors: Red & Black

2012 New Brand promise: People. Passion. Performance.

CLUTCHES SELECTION

Chicago Pneumatic is known worldwide for its variety of durable clutch designs. These clutch options could be divided in two categories:

Medium Duty:

Pin Clutch and Rocking Dog

- High Power / Weight ratio
- Pin clutch: Very good for hard joint applications
- Rocking Dog: Excellent for very soft joint
- Excellent durability for Medium Duty jobs
- Fast rundown

Heavy and Super Duties:

Single & Double Dog, 2-Jaw & 3-Jaw, and Twin Lobe

- Rundown starts slowly but increases constantly
- Performance is excellent for all type of joints
- Twin Lobe clutch especially designed for very soft joints
- 2-Jaw & 3-Jaw: Extraordinary durability for Heavy and Super Duty applications

Impact Wrench 3/4"

CP6060 SASAR

Teasing throttle for better control

Clutch: 2-Jaw

CP6060 ZASAB

with Special Zinc Housing
Non sparking impact wrench for explosive environment

Clutch: 2-Jaw

CP9561

Fast rundown

Clutch: Pin - Oil-Bath

75 to 650 ft.lb (102 to 880 Nm)

FEATURES and BENEFITS

- The Best Super Duty application 3/4" impact available
- Reliable and powerful to 2 Jaw clutch
- Durable Steel Clutch Housing for Super Duty harsh applications
- Pistol Shape with 3-piece construction engineered for easy maintenance
- Balanced to reduce fatigue and increase operator comfort

Clutch : 2-Jaw

Available in 1" Hole:
CP6060 SASAK

CP6120 PASEL

CP6120 GASED

CP6120 GASEL

Clutch: 2-Jaw

CP0614 PALED

CP0614 GALED

Clutch: 2-Jaw

FEATURES and BENEFITS

- Durable Steel Clutch Housing for Super Duty and strong construction
- Designed for Super Duty and harsh applications
- Reliability and extreme power provided by a durable 2-Jaw clutch
- D-Handle shape with internal trigger
- 3-piece construction engineered for easy maintenance
- Adjustable Side Handle allows repositioning of tool according to the application

Clutch: 2-Jaw

Available with External trigger:
CP6120 GASED or CP6120 GASEL

SCREWDRIVER SELECTION

SELECTION GUIDE

1. Types of Screws

Many types of screws are available and are selected depending on the application and material. In addition, thread geometry (insertion speed), and head imprint also influence the choice of the bits and the screwdrivers.

THE MAIN SCREWS TYPES ARE:		THE TYPE OF IMPRINT MAY BE...	
 METRIC Generally used with nuts and threaded holes.		SLOTTED Mainly used in the wood, eye-glasses, electronics sectors, etc.	
 SELF-THREADING These form the thread and tighten at the same time. The thread is created by deformation of the material, making this kind of screw particularly suitable for plastic, wood and other lightweight materials.		CROSS-SLOTTED (PHILIPS-POZIDRIVE) Used on plastic, sheet metal and wood; the cross-slot improves the connection between screw and screwdriver.	
 SELF-TAPPING These are metric screws with special grooves on their threaded shanks which allow the shavings created during tightening to be removed.		TORX This transmits higher torque levels with lower axial thrust. The imprint offers a larger surface contact and effective connection with minimum clearance.	
 THREE-LOBE These are metric screws that tap through the special lobe shape of the shank, thereby deforming the material rather than removing it.		HEX SOCKET SCREW (Allen screw) Normally with metric pitch, it can be used in small spaces.	
 SELF-DRILLING These are self-threading screws with a special "drill" tip that makes the hole during drilling.		HEX HEAD Used in many sectors, both in the metric and in the self-threading and self-drilling versions etc. Particularly effective for high tightening torque levels.	
THE SCREWS CAN BE FITTED WITH:			
 BUILT-IN FLAT WASHER This improves the quality of tightening and makes tightening cycle times quicker.		KNURLED WASHER UNDER THE HEAD Fixed or mobile, it reduces the chances of the screw from accidentally loosening.	

2. Types of Joints

Steel, aluminium, plastic and wood, etc ... create different type of joints and therefore require different tightening forces. That is why it is so important to know are the material used for the joint and what are their specifications to select the perfect screw and screwdriver.

The joints can be differentiate as such:

- Soft: the torque is reached after 2 revolutions (>720°)
- Hard: the torque is reached with a maximum of 30°

As each tightening is unique, you could consider some variations as Very Soft and Medium Soft or Very Hard and Medium Hard.

3. Screws Selection Charts

Fastener Torque Values

THREAD SIZE	MACHINE SCREWS					THREAD FORMING/ROLLING SCREWS
	4.6	5.8	8.8	10.9	12.9	8.8
RECOMMENDED TORQUE (Nm)						
M1.6	0.07	0.12	0.19	-	-	-
M2	0.15	0.24	0.38	-	-	0.5
M2.2	0.19	0.31	0.51	-	-	-
M2.5	0.28	0.48	0.77	-	-	-
M3	0.51	0.85	1.4	1.9	2.3	1.4
M3.5	0.8	1.34	2.2	3.0	3.6	-
M4	1.2	2.0	3.2	4.5	5.4	3.2
M5	2.4	4.0	6.4	9.0	10.7	6.5
M6	4.1	6.8	10.9	15.3	18.3	11
M8	9.8	16.3	26.1	36.8	44.1	26
M10	19.3	32.2	51.5	72	86.9	52
M12	33.6	56	90	126	151	91

For non metric threads please use the following data as a guide.

THREAD SIZE	QUALITY P		QUALITY S		QUALITY T	
	Nm	lbf ft	Nm	lbf ft	Nm	lbf ft
1/4	5.4	4.0	10	7.6	11	8.2
5/16	11.2	8.3	21	15.7	23	17.0
3/8	20.0	14.7	38	27.9	41	30.2
7/16	32.0	23.5	61	44.8	85	48.3
1/2	48.8	36.0	93	68.4	100	73.8

Selecting the Correct Screwdriver

4. Joint/Clutch Combinations

The chart below correlates different joint and clutch combinations. This chart is helpful for initially determining the most likely combination, however on-site testing is recommended to ensure that proper tooling is used for the application.

	Direct Drive	Cushion		Shut-off		
		CP27 Series	CP26 Series	CP20 Series	CP26 Series	CP20 Series
Soft joint (A) and hard joint (B) / metal screw (class 8,8)						
The initial torque required is very low and grows gradually (soft joint A) or rapidly (hard joint B) when the screw head begins to slip on the joint.		Best			xx	xx
		Better		xx	xx	xx
		Good	x	x		
Sheet metal joint / self-threading screw						
The initial torque for forming the thread is lower than the final tightening torque.		Best			xxx	xxx
		Better	xx	xx		
		Good	x			
Enamelled sheet metal joint / self-threading screw						
The initial torque for forming the thread is higher than the final tightening torque.		Best				
		Better	xx	xx		
		Good	x		x	x
Sheet metal joint / self-drilling screw						
The initial torque for making the hole and forming the thread tends to increase rapidly when the screw head slips on the joint.		Best			xxx	xxx
		Better				
		Good	x	x		
Joint with self-locking nut						
The initial torque required to overcome the friction generated by the plastic insert in the nut tends to increase rapidly when the screw head slips on the joint.		Best			xxx	xxx
		Better	xx	xx		
		Good	x			
Joint for wood /plastic screw						
The torque level increases gradually and constantly until the final peak when the screw slips on the joint.		Best	xxx			
		Better		xx	xx	
		Good				x

Checklist for screwdriver selection

- Type of screws
- Type of joints
- Clutch selection
- Tools shape for Handle Type
- Torque and speed requirements

It is therefore important that the right screwdriver is selected to give :

- Accuracy
- High Productivity
- Good Ergonomics
- Improved Quality

xxx Best
 xx Better
 x Good

5. Clutch Type

Direct drive

- No clutch, directly driven bit
- Stall torque regulated to air pressure
- Easy to use and maintain
- Ergonomic handling (light weight, size...)

Cushion clutch

- High speed rundown
- Torque output adjusted by the spring tension
- Clutch ratchets at preset torque
- Easy to use, to adjust and to maintain

Shut-off clutch

- Clutch shut-off the fastening at the preset torque
- Various speeds according to the models
- Torque adjustments for accurate tightenings
- Various shapes and starting mode for all types of applications

6. Screwdrivers Torque and Speed range

FEATURES and BENEFITS

- Multiple combinations of options to suit versatile applications.
- Three air inlets for adaptative tool positioning
- Compact design for easy manipulation
- Keyless clutch for the easy torque adjustment
- 1700 rpm for higher productivity
- One-hand reverse & soft grip for easy handling
- Low vibration & noise level for operator comfort

ERGONOMIC FEATURES

Chicago Pneumatic Abrasive Tools have all the benefits of advanced ergonomics... with the features required to enhance the physical and mental well-being operators need to achieve increased productivity levels:

- . Significant sound and vibration reduction - helps reduce operator fatigue and improve performance.
- . Complete line - designed for maximum productivity under rugged conditions.
- . Wide choice of tools - die grinders, small wheel grinders, horizontal grinders, and vertical grinders.
- . Powerful, yet complete and lightweight - produce more power per pound than comparable electric models.
- . Air powered - Minimal risk of electrical shock or overheating - even with continuous use.

Other Features:

- . Rugged construction - to withstand tough use.
- . Head treated internal parts - keep tool operating, minimize repairs.
- . Easy to service - simple replacement of rotor blades usually restores original power.
- . Wide variety of accessories - extended versatility of the tool.

COLLET GRINDERS

Small precision deburring: die grinding is performed with either tungsten carbide, high speed steel burrs or mounted points.

Carbide Burrs

Mounted Points

Recommended speeds depending on the machined and the diameter of the head of the carbide burrs.

Material Type	Diameter of the head of the carbide burrs				
	1/8" (3 mm)	1/4" (6 mm)	3/8" (10 mm)	1/2" (12 mm)	5/8" (16 mm)
Steel	60,000 - 90,000	45,000 - 60,000	30,000 - 40,000	22,500 - 30,000	18,000 - 24,000
Tempered steel	60,000 - 90,000	30,000 - 45,000	19,000 - 30,000	15,000 - 22,500	12,000 - 18,000

The choice of burr depends on the size of your application. A larger volume of material to be removed will require a bigger size of abrasive.

Select the tool rpm depending on the diameter of the burr head, the material to be ground and the material in the rotary burr. Use tungsten carbide burrs for hard and tough materials. High speed steel burrs are recommended for unhardened and medium hard materials. See table:

SAFETY INSTRUCTIONS

Projectile Hazards for all air tools

- Always wear impact resistant eye and face protection when involved with or near the operation or the repair of air tools.

Breathing Hazards

- Proper breathing protection must be worn when working with materials which produce airborne particles.

Noise Hazards

- Hearing loss can result from prolonged exposure to excessive sound levels.
- Use hearing protection as recommended by your employer or OSHA regulation (see 29 CFR part 1910).

Vibration Hazards

- Repetitive work motions, awkward positions and exposure to vibration may be harmful to your hands and arms.
- If numbness, tingling, pain or whitening of the skin occurs, stop using tool and consult a physician.

Additional Hazards

- Slip/Trip/Fall is a major cause of serious injury or death. Beware of excess hose/cord left on the walking or work surface.
- Operators and maintenance personnel must be physically fit to perform job tasks, and handle the bulk, weight and power of the tool.
- Deburring tools should be used to reduce risk of cuts and abrasions due to burrs.
- Wear gloves to protect hands from sharp edges.

Please refer to tool documentation for additional information.

WHEEL GRINDERS

Pure material removal, regardless of whether it is removed from a cramped or an open space, is determined by the power generated at the grinding process.

The applied feed force and the rotation of the wheel generates a cutting force which multiplied by the peripheral speed of the wheel represents the power removing material (power = peripheral speed x cutting force).

Chicago Pneumatic grinders features a high degree of safety. Safety throttles, over-speed shut-off and wheel guards are good examples of product safety features carried by your grinders.

The table below will help you to translate the peripheral speed of the grinding wheel to the correct rotational speed of the grinder when using a specific diameter of grinding wheel.

Diameter in. (mm)	Maximum work speed in m/s or Feet/Min							
	32	35	40	50	63	80	100	125
1 (25)	6,300	6,890	7,875	9,842	12,401	15,750	19,685	24,600
1-1/4 (32)	24,450	26,740	30,560	38,200	48,130	61,120	76,390	95,490

3 (80)	9,700	10,610	12,130	15,160	19,100	24,250	30,320	37,890
4 (100)	7,640	8,360	9,550	11,940	15,040	19,100	23,870	29,840
5 (125)	6,110	6,680	7,640	9,550	12,030	15,280	19,100	23,870
6 (150)	4,890	5,350	6,110	7,640	9,630	12,220	15,280	19,100
7 (180)	4,070	4,460	5,090	6,370	8,020	1,190	12,730	15,920
7-7/8 (200)	3,400	3,710	4,240	5,310	6,680	8,490	10,610	13,260
9 (230)	3,060	3,340	3,820	4,780	6,020	7,640	9,550	11,940
9-27/32 (250)	2,660	2,910	3,320	5,150	5,230	6,640	8,300	10,380
11-13/16 (300)	2,440	2,670	3,060	3,820	4,810	6,110	7,640	9,550
	2,040	2,230	2,550	3,180	4,010	5,090	6,370	7,960

How ensure operator safety:

- Check the tool free speed
- Match the maximum speed of the abrasive to the grinder
- Inspect the grinding wheel
- Inspect the flange
- Inspect the wheel guard
- Wear protection goggles, gloves & hearing protection
- Test run your grinder in a protected area after assembling the wheel
- Make sure that the tools receive proper maintenance, see service sheet

Grinders for carbide burrs and mounted points

0.5 - 0.7 hp (400 - 500W)

FEATURES and BENEFITS

- Lightweight and ergonomic housing for easy handling and comfort
- Low vibration and noise level for operator safety and comfort
- Good productivity for Medium Duty applications
- Improved spindle design for a high durability in Medium Duty applications

CP3000-424R

Caution: Be sure to comply with all speed, use, and applications recommendations supplied by component and abrasive manufacturers.

Grinders for carbide burrs and mounted points

0.4 to 0.8 hp (300 to 600W)

FEATURES and BENEFITS

- No bevel gears for increased durability
- Motor is aligned with spindle resulting in a simple maintenance
- Efficient motor for good productivity in Medium Duty applications
- Lightweight construction and ergonomic handle for operator comfort
- Low vibration and noise level for operator safety and comfort

Caution: Be sure to comply with all speed, use, and applications recommendations supplied by component and abrasive manufacturers.

Extended Die Grinders

CP3119-..ES

CP3109-..ES

Excellent ergonomics and Governed motor in an extended body

CP3451-18SEC*

Leading cost to power ratio
*Rotative valve, not for CE and North American markets

CP3119-12EL

Excellent ergonomics and Governed motor in a long reach body

CP3119-12EXL

Excellent ergonomics and Governed motor in an extra long reach body

Grinders for carbide burrs and mounted points
0.8 to 1.2 hp (600 to 900W)

FEATURES and BENEFITS

- Powerful tool for versatility
- Governed motor for an optimal speed and productivity
- Low vibration and noise level for operator safety and comfort
- Composite over-housing with thermo insulated grip for operator comfort
- Best performance for grinding in restricted areas
- Cone wheel adaptor

Caution: Be sure to comply with all speed, use, and applications recommendations supplied by component and abrasive manufacturers.

Straight Grinders

CP3249-GABSUDE

High power straight wheel grinders for 8" (200mm) grinding wheels
CE tools, not for North American market

CP3249-GABSYGE with flap wheel

Grinders for type 1 wheels
 ø 6" (150mm) - ø 8" (200mm)
 3.2 - 3.6 hp (2,400 - 2,700W)

FEATURES and BENEFITS

- Robust housing construction for resistance and durability
- Governed and powerful motor for Super Duty applications
- Robust guard construction for operators safety
- Ergonomic handles for steady grip

CP3249-GABSYGE

Steel Housing Grinders

CP9113G

Steel body. Easy safety lever operation
Front Exhaust, please check the local regulation

CP3040 GABTIM

Steel body and durable bevel gear
Side Exhaust

CP3040 GASTIM

Steel extended body, and durable bevel gear
Side Exhaust

Die Grinders for carbide burrs and mounted points
Angle Grinders for depressed center and cut-off wheels
ø 4" (100mm) - 1hp (750W)

FEATURES and BENEFITS

- Very robust construction
- Steel body for durability and resistance to high temperature contact
- Easy safety lever operation
- Extended shaft

CP9113GES

Type 27-42 wheel

Type 1 wheel

Caution: Be sure to comply with all speed, use, and applications recommendations supplied by component and abrasive manufacturers.

Angle Grinders

CP3109-13A4ES

Excellent ergonomics and Governed motor in an extended body

CP3019-18A3

CP3019-20A3

High performance and durability in a lightweight package

CP3019-13A4

High performance and durability for angle grinding in confined areas

Grinders for depressed center and cut-off wheels

Ø 3" (76mm) - Ø 4" (100mm)

0.5 - 0.8 hp (375 - 600W)

FEATURES and BENEFITS

- Governed motor allows optimal speed and productivity
- Low vibration and noise level increases operator safety and comfort
- Composite encased tool housing with thermo insulated grip for operator comfort
- Best performance when angle grinding in restricted areas

CP3109-13A4

Angle Grinders

CP3241-284B7

CP3241-276B7

Governed motor and robust construction for an optimal speed and productivity
For North American markets

CP3241-284B7E

CP3241-276B7E

Governed motor and robust construction for an optimal speed and productivity
CE tools, not for North American markets

CP3450-12AB5

CP3450-12ACR4*

Industry leading cost to power ratio with rotative valve
*Rotative valve, not for CE and North American markets

CP3450-12AC4

CP3450-12AC45

Grinders for depressed center wheels and cut-off wheels

ø 4" (100mm) - ø 4.5" (115mm) - ø 5" (125mm)
ø 7" (180mm) - 1.1 - 2.2 hp (810 - 1,650W)

FEATURES and BENEFITS

- Industry leading cost to power ratio
- Ungoverned powerful motor to match all applications
- Orientable safety lever to improve ergonomics and versatility
- Constantly lubricated bevel gears for a high durability
- Angle head low profile, allows grinding in restricted areas and improves operator visibility

CP3450-12AA5

Pistol and Angle Sanders

CP3070-120G

Easy operation for a variety of sanding applications. High durability.

CP3030-515AFR

High performance for angle sanding in restricted areas

CP3030-420AFR

CP3030-415AFR

High performance for angle sanding in restricted areas

CP3019-12AF

Best performance and durability for angle sanding in a lightweight package

CP3030-325AFR

High performance for angle sanding in restricted areas

Sanders for abrasive discs
 ø 2" (50mm) - ø 3" (76mm) - ø 5" (125mm)
 0.4 to 0.7 hp (300 to 500W)

FEATURES and BENEFITS

- Best performance and durability for angle sanding in a lightweight package
- Governed motor for an optimal speed and productivity
- Low vibration and noise level for operator safety and comfort
- Composite over-housing with thermo insulated grip for operator comfort

CP3019-20AF

Caution: Be sure to comply with all speed, use, and applications recommendations supplied by component and abrasive manufacturers.

Air Scribe, Engraving Pen and Piston Scalers

FEATURES and BENEFITS

- High durability
- Convertible to hammer or scaler for precise material removal work
- Adjustable power for a variety of applications
- Chicago Pneumatic Air Scribe writes as easily as a ball point pen. Ideal for use on a variety of materials such as metals, plastics, ceramics, and glass.

Percussive Tools

B20-00

Flexible and low air consumption

B20-0

Handy handle length 43" (1,100mm) covers all basic application

B20-1

Longest reach handle 68" (1,730mm) enable the widest scaling work

B20L

Aluminum body to reduce weight

B20L-1

Lightweight suitable for vertical work

Long Reach Scalers

FEATURES and BENEFITS

- The most flexible tool for all types of cleaning, scraping, and scaling applications
- Multiple tool lengths from 28" (710mm) to 68" (1,730mm)
- Light version for vertical work (Aluminium body)
- High efficiency low air consumption
- A wide range of tools and accessories including Needle Scaling attachments, Scraper Blades, and a full range of standard 5/8" hex chisels to expand application versatility.

All models: Supplied without chisel.

For Air Line accessory products, Balancers please see pages 78 to 93

Percussive Tools

CP0951

High durability and low vibration

CP0952

High durability

CP716

Greater control and operation allows for wide variety of applications

CP9356

Versatile design, convertible to needle scaler

Needle Scalers, Chipping Hammer and Weld Flux Chipper

FEATURES and BENEFITS

- Sturdy and simple design for heavy and wide applications
- Superior design with internal spring components provides greater durability

Chisel scalers: Supplied without chisel - CP9356NS: Supplied with chisel tip needles and round sleeve.

All models: Hose int. 3/8" (10mm) - @90 PSI (@6.3 bar).

Air Line Network

Chicago Pneumatic Air Preparation Units are designed to help you get maximum performance from your tools. They ensure minimal pressure drop and thus minimum energy losses in the air distribution system, benefiting the environment and cutting your operating costs.

The lifetimes of your tools will be extended by using air preparation units and with that comes lower repair costs and less downtime. A correct air installation guarantees productivity and good total economy.

Air dryers and filters can cause a 0.2 - 0.3 bar (3-4 psi) pressure drop. However, for many applications these may be essential.

A carefully designed network virtually eliminates pressure drop. We recommend a Ring Main layout which has a slope away from the input of 1%.

To receive 6.3 bar (91psi) at the tool, the acceptable maximum pressure drop from airline accessories is 0.6 bar (9 psi). A combination of high performance components and careful engineering will achieve this.

A normal compressor can deliver up to 7.5 bar (109 psi) air line pressure, depending on start and stop settings.

Air Preparation Units

FILTERS, REGULATORS, LUBRICATORS

Why should you use a filter, regulator and lubricator ?

The use of a filter, regulator and lubricator (in that order) for pretool air preparation is strongly recommended by Chicago Pneumatic. Proper air preparation will result in improved tool performance and increased tool life. The units should be mounted as close to the tool as possible, preferably right where the tool hose is connected to the system. To realize their full value, these units should be checked on a regular assigned basis by maintenance workers or the operators themselves.

AIR FILTER

Filter separates impurities such as water and solid particles.

Not using filters in combination with air tools leads to shorter service life, higher maintenance costs and lower efficiency. Old air systems with cool dryers, for instance, generate a lot of rust and running tools without installing a filter could damage the tool in less than a week.

Chicago Pneumatic filters separate up to 98% of the water when operating within their working range. All three types (Small, Medium and Big) are very low pressure drop.

REGULATOR

The regulator ensures that the pre-set working pressure remains constant - regardless of pressure variations in the intake air and minor variations in the airflow rate. For example, a pressure of 1 bar higher than necessary results in a 16% increase in air consumption.

Spring controlled regulators are quick acting and therefore should be used for all types of air tools.

TOOL PRESSURE	AIR CONSUMPTION
91 psi (6 bar)	100 %
101 psi (7 bar)	110 %
116 psi (8 bar)	125 %

LUBRICATORS

If lubricators are not used, tool motor vanes will need to be changed more often. The life of the vanes may decrease to as little as 1/10th of the normal working time. The oil fog lubricator is the most common type of lubricator. It supplies a mist of oil to the air hose.

Different types of FRL	Port size in.	Air flows at 6 bars L/S CFM (l/s)
Small units	1/4	Up to 19 (9)
	3/8	Up to 29.7 (14)
Medium units	1/2	Up to 78.4 (37)
Big units	1	Up to 175.9 (83)

Air Preparation Units

FEATURES AND BENEFITS

High air flow capacity: up to 220 cfm (104 l/s) to cover most of the pneumatic tool needs.
Available in kits: 1/4", 1/2", 3/4", BSP or NPT, 2 or 3 stages units or individual units.
Durable design including quick release bayonet metal bowls for rough working environments.

- (1) Liquid level indicator on the bowls for improved reading.
- (2) Filter with 5µm element pre-installed to optimize the air cleaning and with automatic drain valve.
- (3) Supplied with metal pressure gauge 0-10 bar (0-145 PSI) with metric and imperial scales.
- (4) 145 – 245 PSI (10-17 bar) inlet / outlet max. pressure.
- (5) Micro fog lubricator to optimize the air/oil ratio
- (6) Automatic drain valve
- (7) Manual drain

Chicago Pneumatic offers the highest quality of PVC, Rubber and Polyurethane hoses in the Industrial Line to cover the different needs of applications with Power Tools

In addition to this, the EFFI series is designed with special features such as low weight and flexibility, to meet the highest ergonomic demands, as well as antistatic for applications with ESD demands.

HOSES

Antistatic	+++	++	+++	++	-	++
Temperature range	-5 to +140F° -15 to +60°C	-13 to +140F° -25 to +60°C	-40 to +194F° -40 to +90°C	-13 to +140F° -25 to +60°C	-22 to +176F° -30 to +80°C	-40 to +194F° -40 to +90°C

At recommended air flow the pressure drop is 2.9 PSI / 0.2bar with a hose length of 16 ft / 5m. Recommendation is to upgrade one size in diameter for every 32.8 ft / 10m of hose length.

EFFI SERIES

CP EFFI is a unique premium line of hoses designed with special features such as antistatic, extreme low weight, resistance and durability that will help the operator to maximize the tool productivity.

EFFI PVC ESD HOSES

Aimed to electrostatic sensitive devices manufacturers (electronics, radio, communication fields..)

- Antistatic
- Silicone free
- Extra flexible

DIMENSIONS (IDxOD)		LENGTH		MAX WORKING PRESSURE*	AIR FLOW		WEIGHT PER 98 ft / 30m		PART NUMBER

Hoses

PVC, RUBBER AND POLYURETHANE HOSES

Standard quality hose in PVC, PUR and Rubber will provide the best quality product for the price for optimized work with pneumatic tools.

PVC HOSES

Aimed to heavy duty applications (workshops, factories, garages etc.) For indoor use.

- Long service life
- Pliable
- Transparent

POLYURETHANE SPIRAL HOSE

Spiral hose are especially adapted for tools used at varying distances. Vertically or horizontally, together with a balancer spiral hose, it is a step forward in ergonomics. Equipped with ball bearing at one end (except the 11x16), they can be directly connected at the tool outlet, avoiding the hose to twist.

- Self retractable
- Light and flexible
- Strong and durable

Hose Reels

CUSTOMERS BENEFITS

- No hoses on the ground for improved safety
- From 3.3 to 33 ft / 49 or 52 ft (1 to 10 / 15 or 16 m) hose lengths with feedback force for a clean work space
- Directional swivel-plate to help you correctly reach your application
- High airflow for maximum productivity
- Lightweight and flexible polyurethane hose to reduce operator fatigue
- Open Reels with rubber hose available for heavy-duty grinding/spark areas
- Working temperatures: -30°C+ 60°C (-4°F +140°F)

APPLICATIONS

- Workshops and service stations in the automotive, truck, earthmoving and farming industry
- Industrial assembly lines
- Shipyards, Foundries

A

HR S, HR M & HR L / Hose Reel Small Closed Composite Series

Compact and ergonomic plastic casing air hose reel

Airflow > 14.8 cfm (7 l/s)

B

HR M / Hose Reel Medium Closed Steel Series

Heavy-duty air hose reels in steel for longest lifetime

Airflow > 21.2 cfm (10 l/s)

C

HRO M / Hose Reel Medium Open Steel Series

Heavy-duty air hose reel in industrial quality

Airflow > 17.6 cfm (8.5 l/s)

D

HRO L / Hose Reel Large Open Steel Series

Heavy-duty air hose reel in industrial quality

Airflow > 33.6 cfm (16 l/s)

E

CP9445H 3/8HD / Hose Reel 50FT 15M

CP9455H 1/2HD / Hose Reel 50FT 15M

Steel Series

Light-duty air hose reel in industrial quality

Couplings

Chicago Pneumatic offers a wider range of couplings to create the best possible solution together with Power Tools. The range consists of four types of couplings with different characteristics, all with the focus on quality, ergonomics and performance. To cover most of the global needs Chicago Pneumatic offers three types of nipple profiles, Euro-, ISO 6150B- and the Asian profile. With the Easy Flow coupling Chicago Pneumatic can present a unique coupling with no air restriction, minimizing the pressure drop.

Thanks to its innovative design EF is suited for rough environment and it is easy and secure to connect and disconnect with the push and bend principle.

The safety feature in EF and Safety Couplings are vented versions to minimize the risk of sudden separation of coupling and nipple.

	Air Flow	Safety feature	Rough environment	Durability	Ergonomics

AIR FUSES

When a fitting comes loose from a pressurized hose or the hose is damaged, the hose starts to blow an excessive amount of air in an uncontrolled way, causing hose whip. This can cause injury, and damage to the workpiece and environment.

A way to ensure that this doesn't happen is to use an Air Fuse. It reduces the likelihood of potentially dangerous hose whip

caused when a hose bursts or a fitting becomes detached. It quickly shuts off the supply and resets automatically as soon as back pressure in the line downstream is restored.

Air Fuses help to meet OSHA requirement 1926.302 (USA) and may eliminate the need for restraining or shielding hose, as required by European Standard EN983.

- Reduces risk of hose whip, helping to protect personnel
- Simple and reliable design
- High life expectancy

- Aluminium anodised body for high corrosion resistance
- Auto-Reset to restart downstream activity with the minimum downtime

TEST EQUIPMENT

AIR TOOL SIMULATOR

DESCRIPTION	PART NUMBER
Air tool simulator	615 811 0090

To check whether the pressure or air flow is sufficient. The air tool simulator will be connected instead of the pneumatic tool. Supplied with different connections.

Balancers

BALANCERS - CP9911 to CP9950

The CP balancers are premium quality products developed to take the weight of the tool away from the operator's arm. They eliminate stress and fatigue and help improve productivity. Ideally suited for heavy tools and/or repetitive tasks.

Spring retractor:

- . Cylindrical shape
- . Automatic load retraction
- . Working area remains free
- . Cable made of stainless steel
- . Aluminium housing
- . 5.2 to 8.2 ft (1,600 to 2,500 mm) cable stroke

The Right Compressed Air Solution

The right compressed air solution

HIGH PERFORMANCE PRODUCT

At Chicago Pneumatic, quality is a priority!
We are constantly optimizing our products to offer you the right compressed air solution to get the job done.

OUR PRODUCTS PROVIDE:

Performance in the most important ways - air flow, energy efficiency..

Durability of materials at the value you are looking for operator comfort thanks to design features that reduce noise, vibration, etc...

OUR PRODUCT OFFER

With our focus on your industry, Chicago Pneumatics is the perfect partner for industrial projects with piston compressors, rotary screw compressors, and compressed air solutions for a wide range of applications.

Please contact the CP Compressor Division for additional information.

Check our full offer on www.cp.com

Professional Mobile...

CPRA / CPRB

Series - 1 - 3 hp (0.7 - 2.2kW)

FEATURES

Ducting

The air intake, air outlet and the cooling of the air are all at the same side, which makes it easy for ducting. The machine can be installed against a wall if ducting is performed.

Cooling

A large axial fan with separate motor and oversized oil/air and air/air cooler for better cooling.

Filtration

Filtration of the incoming cooling air as well as the air inlet of the compressor through a high efficiency plated air filter.

Oil separation

The oil vessel and oil filters are designed for separation of the oil to a residual level of 3ppm and a minimal pressure drop over the compressor.

USER BENEFITS

Accessibility of parts

All consumables at same side of the machine and easy to access.

Oil level eye and oil plug

For easy oil filling

Easy to Drain

Ease of maintenance

Large damping pads

Low noise level and low vibrations

ES3000

1 easy and efficient controller for the whole range.

Technology		Piston compressor
Use		Short time - intermittent
Noise level		Standard
Vessel sizes		1.3, 2.6, 2.9+2.9, 6.3, 13, 24 or 53 Gal - (6, 10, 11+11, 24, 50, 90 or 200 L)
Air displ.		4.6 - 12 cfm (130 - 340 l/m)
Power		1 to 3 hp (0.7 to 2.2 kW)
Pressure		116 - 145 psi (8 - 10 bar)
Weight		33 - 214 lbs (15 - 97 kg)

FLEXIBILITY AND COMPACTNESS

Short tasks to complete and small things to repair?

The direct driven oil lubricated compressors are suitable range which has been designed with an eye on quality and robustness. Perfect alignment of the panels and the possibility to duct and place against a wall are the big advantages of this range.

General Assembly & Light...

CPA / CPB Series - 7.5 - 40 hp (5.5 - 30kW)

INNOVATIVE DESIGN CONCEPT

The CPA-CPB Series can be configured as an ultimate all-in-one solution that is comprised by:

- Air receiver 270 or 500L
- Refrigerant dryer
- Automatic drain
- Line filter

Forget about complex and costly installations. Simply connect the power, connect the piping and press START!

Technology		Screw compressor
Use		Continuous
Noise level		Silent: 66 - 77 dB(A)
Vessel sizes		0.27 or 132 Gal (0, 270 or 500 L)
FAD		18 - 137 cfm (520 - 3893 l/min)
Power		7,5 - 40 hp / 5,5 - 30 kW
Pressure		116 - 188 psi (0, 270 or 500 L)
Weight		553 - 1441 lbs (251 - 654 kg)

FEATURES

Dry and clean air.

The CPA-CPB provides you with dry and clean air suitable for even the most demanding applications. No moisture, solid and liquid particles that compromise or damage your pneumatic equipment.

Oversized air-oil separator.

Designed to provide an ultra-low residual oil content: only 3 ppm will enter your network. The oversized air-oil separator has a large surface area to separate the oil, which also results in low pressure drop and better energy efficiency.

USER BENEFITS

Low noise levels

Insulation foam, deflectors and anti-vibration pads assure low noise levels.

Easy and fast maintenance

Enabled by good positioning of service items: belts, oil and filters

ES3000

A unique control unit, specially programmed for energy saving

Built to last

Designed for continuous duty and very hard working conditions

Small footprint

Compresses, stores and processes air using just 1,5 m².

THE ULTIMATE ALL-IN-ONE SOLUTION

Chicago Pneumatic introduced the CPA-CPB Series more than a decade ago. And in this period of time CPB Series is a strong reputation of quality and top performance was built.

But, apart from this remarkable past, the design and philosophy have evolved to match new customer needs: a beautiful all-in-one, powerful and silent screw compressor.

That's what the CPA-CPB Series is!

Light Industry

CPC / CPD Series

40 - 125 hp (30 - 90kW)

FEATURES

Ducting

The air intake, air outlet and the cooling of the air are all at the same side, which makes it easy for ducting. The machine can be installed against a wall if ducting is performed..

Cooling

A large axial fan with separate motor and oversized oil/air and air/air cooler for better cooling.

Filtration

Filtration of the incoming cooling air as well as the air inlet of the compressor through a high efficiency plated air filter.

Oil separation

The oil vessel and oil filters are designed for separation of the oil to a residual level of 3ppm and a minimal pressure drop over the compressor.

USER BENEFITS

Accessibility of parts

All consumables at same side of the machine and easy to access.

Oil level eye and oil plug

For easy oil filling

Easy to Drain

Ease of maintenance

Large dampening pads

Low noise level and low vibrations

ES3000

1 easy and efficient controller for the whole range.

Technology		Screw compressor
Use		Continuous
Noise level		Silent: 67 - 76 dB(A)
Vessel sizes		1013 - 5174 GAL - (3833-19583 l)
FAD		51 - 167 cfm (1440 - 4740 l/min)
Power		40 - 125 hp (30 - 90kW)
Pressure		116 - 132 psi (8 - 13 bar)
Weight		1499 - 2645 lbs (680 - 1200 kg)

POWERFUL, COMPACT AND EASY TO MAINTAIN

For bigger installations the belt driven CPC and CPD range has been designed in order to suit your needs.

Compact, easy to install and maintain, the complete range has been designed with an eye on quality and robustness. Perfect alignment of the panels and the possibility to duct and place against a wall are the big advantages of this range.

General Safety Instructions for the Operation of Power Tools

The goal of Chicago Pneumatic is to produce tools that help the operator work safely and efficiently. The most important safety device for this or any tool is the operator. Care and good judgement are the best protection against injury. All possible hazards cannot be covered here, but we have tried to highlight some of the important ones. Individuals should look for and obey Caution, Warning and Danger Signs placed on tools, and displayed in the workplace. Operators should read and follow safety instructions packed with each tool. For a copy of these instructions, contact Chicago Pneumatic Customer Service in the USA and Canada at (800) 624-4735 or contact your nearest Chicago Pneumatic representative.

Learn how each tool works. Even if you have previously used similar tools, carefully check out each tool before you use it. Get the "feel" of it and know capabilities, limitations, potential hazards, how it operates and how it stops.

WARNING

Multiple Hazards. Read and understand safety instructions supplied with tool before operating or servicing. Failure to do so can result in serious bodily injury.

All tools are designed to operate on a air line pressure of 6.3 bar +/- 0.15 bar in accordance with ISO2787, 8NTC1.2. Sound levels +/- 3dB(A)* are measured in accordance with EN ISO15744. Vibration values* are measured in accordance with ISO8662 & ISO28927

**These declared values were obtained by laboratory type testing in accordance with the stated standards and are suitable for comparison with the declared values of other tools tested in accordance with the same standards. These declared values are not adequate for use in risk assessments and values measured in individual work places may be higher. The actual exposure values and risk of harm experienced by an individual user are unique and depend upon the way the user works, the workpiece and the workstation design, as well upon the exposure time and the physical condition of the user. We, Chicago Pneumatic, cannot be held liable for the consequences of using the declared values, instead of values reflecting the actual exposure, in an individual risk assessment in a work place situation over which we have no control.*

Compressed Air Hazards

- Air under pressure can cause injury. Never point an air hose at yourself or anyone else. Never blow your clothes free of dust with compressed air. Always direct exhaust air away from yourself and others in the work area.
- Always check for damaged or loose hoses and fittings before using an air tool, and replace if necessary. Whipping hoses can cause serious injury.
- Disconnect the tool from the air supply when not in use, before changing accessories, setting the torque, or when making repairs.
- Do not exceed rated air pressure to increase the output of the tool. This could cause injury and shorten tool life.
- Do not assemble quick coupler on the tool. Vibration can cause breakage resulting in a whipping air hose. Instead, use quick couplers on the end of a short leader hose.
- When universal twist couplings are used, lock pins must be installed to prevent accidental hose disconnection.
- Air tools are not intended for use in explosive atmospheres and are not insulated for contact with electric power sources.

Projectile Hazards for all air tools

- Always wear impact resistant eye and face protection when involved with or near the operation or the repair of air tools.

Noise Hazards

- Hearing loss can result from prolonged exposure to excessive sound levels.
- Use hearing protection as recommended by your employer or OSHA regulation (see 29 CFR part 1910).

Entanglement Hazards

- To reduce the risk of injury from entanglement, do not wear loose clothing when using rotating accessories.

Additional Hazards

- Slip/Trip/Fall is a major cause of serious injury or death. Beware of excess hose/cord left on the walking or work surface.
- Operators and maintenance personnel must be physically fit to perform job tasks, and handle the bulk, weight and power of the tool.
- Deburring tools should be used to reduce risk of cuts and abrasions due to burrs.
- Wear gloves to protect hands from sharp edges.

Breathing Hazards

- Proper breathing protection must be worn when working with materials which produce airborne particles.

Vibration Hazards

- Repetitive work motions, awkward positions and exposure to vibration may be harmful to your hands and arms.
- If numbness, tingling, pain or whitening of the skin occurs, stop using tool and consult a physician.

Specific Safety Instructions for Power Tool Groups

In addition to the General Safety Instructions, the following are safety instructions and warnings that apply to the safe operation of specific power tool groups. Consult ANSI B186.1 Safety Code for Portable Air Tools. Available from: America National Standards Institute (ANSI), 11 W. 42nd St., 13th floor, New York, New York 10036, (212) 642-4900; or the European Committee for Standardization, Rue de Stassart 36, 1050 Brussels, Belgium.

Impact Wrenches

- Never use hand sockets. Use only impact sockets in good condition. Sockets in poor condition reduce impact power and could also shatter, resulting in personal injury.
- When using a universal joint, never free run the tool, it may run too fast and cause the joint to be thrown from the tool.
- Always use the simplest hook-up possible. Long springy extension bars and adapters absorb impact power and could break loose resulting in personal injury. Instead, use deep sockets whenever possible.
- For tools using the pin and o-ring socket retainer, use the o-ring to securely retain the socket pin.

Abrasive Tools

- Never mount a grinding wheel on a sander.
- Never use a grinding wheel marked with a speed lower than the rated air grinder speed.
- All grinding wheels and polishing/sanding accessories should be checked for cracks or other damage before mounting and use.
- Always use the recommended wheel guard to prevent injury when performing grinding operations. If a guard has withstood wheel or disc breakage, it must be replaced.
- Position a guard between the grinding wheel or disc and the operator. Use barriers to protect others from fragments and grinding sparks.
- Make sure grinding wheels are mounted according to manufacturer's specifications; always use correct mounting flanges.
- Before grinding, test grinding wheel or disc by briefly running tool at full throttle. Be sure to use a barrier (such as under a heavy work table) to protect yourself from possible broken wheel parts.
- Never tamper with or remove a speed governor from a tool to make it run faster. Periodically check tool speed with a tachometer.

Assembly Tools

- Serious injury can result from over-torqued or under-torqued fasteners, which can break, or loosen and separate.
- Released assemblies can become projectiles. Assemblies requiring a specific torque must be checked using a torque meter.

Hammers

- All chisels, rivet sets and other accessories should be checked for cracks, excessive wear, or other physical damage before each use. Accessories that show signs of damage should be replaced immediately.
- Never use a tool without the proper accessory retainer.

Drills

- Keep away from rotating bit and chuck. You can become cut or burned if you come in contact with the drill bit, chips or work surface.
- Use intermittent drill pressure to avoid long shaved chips.
- The drill bit can suddenly bind and cause the work piece or tool to rotate causing arm and shoulder injuries.
- ANSI recommends use of a support handle on drills with a chuck larger than 3/8" (10 mm).

Accessories

- Always use accessories of correct size and design for the tool. Tool and accessories must not be modified in any way.
- Never use a tool without the proper accessory retainer.

See Safety Requirements for Abrading Materials with Coated Abrasives (B7.7) from ANSI.

Sound & Vibration Values

All values are current as of the date of this publication. For the latest information please visit www.cp.com

VIBRATION LEVELS

The vibration values are reported in accordance with standard ISO28927-x (effective from 29.12.2009) or standard EN60745 for power tools. a gives the vibration value (m/s²) and K the measurement uncertainty (m/s²). They represent the values, as measured in the lab, taken from 3 axes and closest to real conditions, rather than the data obtained on one axis as was the case under the previous standard ISO8662-x. Nevertheless, these other values are also available for comparison. For more information, please visit our website www.cp.com

Chicago Pneumatic Tools follows a policy of continuous product improvement. Specifications and descriptions are thus subject to change without notice. Check the online ecatalog at www.cp.com for the latest product information.

Warranty Information

Chicago Pneumatic

Standard Limited (1-Year) Warranty

Limited Warranty: Industrial, tool products (“the Products”) of the Chicago Pneumatic Tool Co. LLC (“CP”) are warranted to be free from defects in material and workmanship for one year from the date of purchase. This Warranty applies only to Products purchased new from CP or its authorized dealers. Of course, this Warranty does not apply to products which have been abused, misused, modified, or repaired by someone other than CP or its Authorized Service Representatives. If a CP Product proves defective in material or workmanship within one year after purchase, return it to any CP Factory Service Center or Authorized Service Center for CP tools, transportation prepaid, enclosing your name and address, adequate proof of date of purchase, and a short description of the defect. CP will, at its option, repair or replace defective Products free of charge. Repairs or replacements are warranted as described above for the remainder of the original warranty period. CP’s sole liability and your exclusive remedy under this Warranty is limited to repair or replacement of the defective Product.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, OR CONDITIONS, WRITTEN OR ORAL, EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ALL WARRANTIES, OR CONDITIONS, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY DISCLAIMED, THERE SHALL BE NO LIABILITY FOR INCIDENTAL, CONSEQUENTIAL, OR SPECIAL DAMAGES, OR ANY OTHER DAMAGES, COSTS OR EXPENSES EXCEPTING ONLY THE COST OR EXPENSE OF REPAIR OR REPLACEMENT AS DESCRIBED ABOVE.

Over 110 years of experience

Since 1901 the Chicago Pneumatic name has represented high-performance tools and equipment designed for an extensive range of applications. Today, Chicago Pneumatic has a global reach, with local customer centers around the world. Chicago Pneumatic tools and air compressors are tailored to the needs of the industrial, vehicle service, and construction markets. Every day we develop and manufacture new products that are meant to meet your demands not only today, but tomorrow as well.
